Location: Faridabad, Haryana

Email: singhprashant0824@gmail.com
Mobile: +91 9910238980

EDUCATION

- Chandigarh University India
Bachelor of Engineering - Computer Science 2019 - 2023

SKILLS SUMMARY

- Languages: Python, SQL
- AI/ML: LLMs, Transformers, NLP, Hugging Face, OpenAI APIs
- Frameworks: FastAPI, PyTorch
- Tools: Docker, Kubernetes, Postman, FAISS
- Cloud: GCP, GCR
- Other: API Development, Database Design, Web Scraping

EXPERIENCE

- Samodrei LLC Jul 2025 - Present
AI Engineer
 - Voice AI Platform:** Built a real-time AI voice agent system for automated outbound campaigns with dynamic multi-turn conversations.
 - Low-Latency Pipeline:** Engineered end-to-end voice pipeline (Twilio → Deepgram → OpenAI → ElevenLabs) achieving **800–900ms latency**.
 - RAG System:** Developed scalable Retrieval-Augmented Generation using FastAPI, OpenAI embeddings, and **Qdrant vector DB** for contextual responses.
 - Streaming Architecture:** Implemented async WebSocket-based streaming (STT + TTS) for real-time interactions using asyncio and chunked audio processing.
 - Campaign Automation:** Built bulk calling system with scheduling (APScheduler), retries, and queue-based execution for large-scale campaigns.
 - Voice & Personalization:** Enabled persona-driven agents with custom prompts and **voice cloning using ElevenLabs APIs**.
 - Call Intelligence:** Implemented IVR detection, DTMF automation, and post-call summarization with CRM integrations (Zoho, HubSpot, Salesforce).
 - Observability & Costing:** Designed latency tracking across STT/LLM/TTS pipeline and real-time cost monitoring across AI services.
- ML AI Digital Pvt Ltd Oct 2023 - Jun 2025
AI Engineer
 - LLM Solutions:** Designed and deployed AI systems using OpenAI and Hugging Face models for real-world applications.
 - NLP Pipelines:** Built end-to-end NLP pipelines including tokenization, Named Entity Recognition (NER), and pattern extraction.
 - Scalable Deployment:** Implemented Docker and Kubernetes for scalable model deployment on GCP.
 - API Development:** Developed REST APIs and automated workflows using FastAPI and Postman.
 - Performance Optimization:** Improved real-time model response efficiency by **20%** through parameter tuning.
- ML AI Digital Pvt Ltd Jul 2023 - Sep 2023
Python Developer Intern
 - Chatbot Development:** Built chatbot systems using OpenAI APIs achieving **90% query resolution rate**.
 - Web Scraping:** Developed scraping pipelines using BeautifulSoup and Scrapy.
 - Backend Development:** Built web applications using FastAPI and PostgreSQL.
 - Data Handling:** Worked on large-scale data processing and file I/O operations.

PROJECTS

- Resume Parser:** Developed an NLP-based resume parser using NER and pattern recognition. Processed **500+ resumes/month**, reducing manual effort by **95%** and improving hiring efficiency by **35%**.
- Document Search Chatbot:** Built a chatbot using OpenAI embeddings and FAISS indexing for semantic search. Implemented contextual Q&A with follow-up understanding.
- Multilingual Chatbot (ICICI Bank):** Enabled multilingual capabilities using ModernBERT, AI4Bharat, and NLLB models. Handled **100K+ queries/day** with improved latency and **30% better user satisfaction**.

CERTIFICATIONS

- **Microsoft:** AI-102 Azure AI Engineer Associate
- **Oracle:** OCI Foundations
- **Coursera:** Programming for Everybody, Data Science in Python

LANGUAGES

- : English, Hindi
